Giant Darwin Tulips

Figure following each varietal name indicates relative time of flowering. Heights given are comparative only.

A vigorous race of beautiful self-colored flowers, distinguished by their strong and tall stems, and shapely flowers in March and April.

Plantings in heavy soil call for a handful of river sand

below each bulb. Top of bulb should be about 6 inches below surface in sandy soil, and about 5 inches below surface soil in heavy soil. Tulips must be watered weekly during rainless intervals. Half a handful of steamed Bone-meal mixed with earth below each bulb when planting will supply sufficient plant food. (All prices Postpaid)

All of the so-called "forcing" varieties of Hyacinths, Lily of the Valley, Narcissi, Sacred China Lillies, Tulips, Freesias, Crocus, etc., may be grown successfully, without drainage, in our specially prepared, clean and odorless bulb fibre. It is thus possible to utilize decorative bowls, vases, jardinières or other containers, which have no provisions for drainage.

Saturate the bulb fibre thoroughly before using. Squeeze out all surplus moisture.

Water occasionally to maintain uniform moisture absolutely necessary to even growth of bulbs. If you overwater, drain off any surplus by tipping container on its side.

Bush Roses—Novelties and Favorites

(All prices Postpaid)

Order Early (Early planting assures success)

Our rose bushes are handled as nature intended. They are not dug prematurely in full foliage, nor are they in any way treated to preserve them.

We grow our own roses at our Highway Nursery, located on the El Camino Real (U. S. 101 Highway), 1½ miles south of Sunnyvale toward Santa Clara. Why not visit our fields during the Summer months?

We are very careful to bud our roses only on such wild

understocks as are definitely superior for the variety. This enables us to offer bushes with a more vigorous constitution, evidenced by an extended season with more profuse blooms and long life.

We offer for our discriminating trade, only the most carefully selected, graded stock of 2-year old, budded field grown roses. We have a ready market for the light grades, elsewhere.
